## OBJECTIVE

---

Results-driven professional with hands-on experience across enterprise systems, project coordination, and digital operations. Skilled in building and maintaining business-critical technology, cross-functional collaboration, and process improvement. Seeking to leverage technical and operational experience to support a dynamic organization.

## TECHNICAL SKILLS

---

**Salesforce:** Apex, Lightning Web Components (LWC), SOQL, Salesforce Flow, Experience Cloud, Permission Sets, Custom Metadata Types, Salesforce DX

**Languages/Tools:** Python, JavaScript, Git, GraphQL, pytest

**AI Tools:** Claude, ChatGPT (AI-assisted development, planning, and workflow automation)

**Design & Content:** Adobe Illustrator, Photoshop, Premiere/CapCut, Canva, Figma, Photography

**Other:** Shopify, GA4/Hotjar

## EXPERIENCE

---

### *Salesforce Developer | Homze*

*August 2025 - August 2026*

- Owned the interior-trades half of the company's full sales-to-completion pipeline on a 2-person dev team, designing 3 custom Salesforce objects and Apex services now used for every interior-trade sale company-wide.
- Designed and built a Salesforce-native Project Management system replacing a third-party PM tool, covering signed estimates through contractor invoicing for every job the company sells.
- Built a guest-accessible Experience Cloud client portal (dynamic estimate to invoice to receipt) with a branded PDF receipt generator, used by every company client.
- Designed front-end UI/UX for the client-facing portal and internal PM interfaces, matching the company's brand system.
- Rebuilt the company's project-margin analytics tool as a role-based Salesforce widget (Accounting vs. PM visibility), replacing a manual spreadsheet process.
- Contributed core features to an internal Python compiler powering pricing logic across 8 trade modules; authored the Flooring module end-to-end.

### *IT Team Member | Los Angeles Clippers*

*August 2025 - Current*

- Support venue technology across NBA games and events annually, maintaining near-zero downtime across networking, AV, and arena systems
- Verify game-day systems functionality pre-event, including POS, entry gates, badge ID, and NFC readers
- Perform Ethernet routing, cable setup, and network switch configuration for the scorer's table and venue systems during live games
- Pair and deploy PixMob wristband systems for in-arena productions, coordinating with broadcast and game-operations teams in real time
- Provide front-line technical support during events, troubleshooting issues in real time and resolving tickets across departments

### *Founder | Menacity Clothing*

*August 2023 - December 2025*

- Managed Shopify platform operations including product uploads, user permissions, and storefront configurations, and led content creation (photography, video editing, graphic design) for campaigns and marketing.
- Used analytics tools (GA4, Hotjar) to diagnose UX issues and implement continuous improvement strategies.
- Developed internal documentation for campaigns, system updates, and operational checklists.

### *Marketing Specialist | Danny Le Realty*

*September 2022 - August 2023*

- Supported CRM data entry and campaign workflow maintenance to ensure lead management efficiency.
- Provided cross-functional administrative support for event planning, digital asset creation, and client follow-up.
- Designed branded content for digital and print marketing initiatives using Photoshop and Canva.

## EDUCATION

---

### *University of California, Riverside*

- Bachelors of Science, Computer Science
